Genomic and Precision Medicine Forum

“Implementation of pharmacogenomics at Indiana University”

Date: March 2, 2017
Location: Duke Medicine Pavilion
2nd Floor - Room 2W96
Time: 12:00pm – 1:00pm
Presenters: Todd Skaar, PhD

Dr. Skaar is an Associate Professor of Medicine in the Division of Clinical Pharmacology at the Indiana University in Indianapolis, Indiana. He did his graduate work in nutrition at the University of Wisconsin and lactation physiology at the Pennsylvania State University, followed by a postdoc in breast cancer drug resistance at the Lombardi Cancer Center at Georgetown University. Since joining Indiana University, his research is focused on the discovery and implementation of genomic predictors of drug response. More specifically, his studies are focused on genetic variants in the ADME genes. The discovery studies are funded by two NIH grants focused on identifying genetic variants that are associated with clinical drug efficacy and toxicity.

Credit Designation Statement: Duke University Health System Department of Clinical Education and Professional Development designates this educational activity for a maximum of 1 AMA PRA Category 1 Credit(s)™. Physicians should claim only credit commensurate with the extent of their participation in the activity.
